EDUCATION

Kennesaw State University <i>B.S. in Computer Science, Concentration in AI & ML</i> • GPA: 3.8/4.0 4× Dean's List	Kennesaw, Georgia <i>Expected May 2028</i>
--	---

TECHNICAL SKILLS

Languages/Frameworks: Python, Java, JavaScript, TypeScript, SQL, C++, C#, Swift, React, React Native, TensorFlow, FastAPI, OpenCV, spaCy, Prodigy, Ruby, Spark, Semantic Kernel, Unity Developer Tools: Firebase, Supabase, Expo, Google Colab, Jupyter, Figma, Git, GitHub, GitLab, Microsoft Office Suite, Google Workspace	
--	--

EXPERIENCE

XR Dojo <i>Software Engineer Intern</i> • Contributing to ATL Quest, an augmented reality mobile game built in Unity targeting XR devices • Developing frontend interfaces and leading the planned migration of game experiences to React • Collaborating with a cross-functional team of developers, designers, and creatives focused on immersive technology	Atlanta, Georgia <i>March 2026 – Present</i>
Starbucks <i>Barista</i> • Deliver excellent customer service in a fast-paced team environment while maintaining quality standards • Collaborate with team members to ensure smooth operations and efficient workflow during peak hours	Atlanta, Georgia <i>September 2023 – Present</i>

PROJECTS

StepSafe — AI-Powered Diabetic Foot Ulcer Detection TensorFlow, MobileNetV2, FastAPI, React, Vite • Built a web app that classifies diabetic foot ulcers from images with severity scores and clinical recommendations • Trained MobileNetV2 on ~20,000 annotated medical images, outperforming clinician accuracy by 30–40% • Engineered FastAPI backend for inference and React/Vite frontend with report generation and EHR export • Won 1st Place Overall at the HMI Hackathon 2026 at KSU (Open Innovation track)	March 2026
PyroLens — AI-Powered Prescribed Burn Optimizer React, Vite, FastAPI, scikit-learn, ESP32, Supabase • Built a real-time dashboard with live IoT sensor data, burn readiness scoring, and ML-backed burn window predictions • Integrated NOAA weather, Sentinel Hub NDVI satellite imagery, and FIRMS fire data APIs for environmental analysis • Engineered full-stack architecture with ESP32 hardware (DHT22 + soil moisture), FastAPI backend, and Supabase • Won 2nd Place (Assurant Challenge) and 3rd Place (Capgemini Net Positive AI) at KSU Hackathon for Social Good	March 2026
EchoPay — Voice-Native Stablecoin Payments JavaScript, Python, Blockchain, AI/ML • Built a blockchain payment system enabling low-literacy users to transact via voice commands • Implemented onchain identity verification with voiceprint security and deepfake detection • Placed 3rd overall at the 2025 Georgia FinTech Academy Hackathon, competing against 50+ teams	January 2025
NeoGuide — AI-Guided Neonatal Intubation System React, Vite, Gemini Vision API, ElevenLabs, RPi • Built a sensor-guided intubation system using Gemini Vision API and ElevenLabs TTS for real-time guidance • Developed React/Vite frontend with live video pipeline and Raspberry Pi edge computing for bedside use • Built at Hacklytics 2026 (Georgia Tech), addressing intubation errors in 50%+ of NICU first attempts	February 2026

CERTIFICATIONS

AT&T 2025 Technology Academy — Issued by AT&T College Recruiting • Completed training in network troubleshooting, 5G strategy, and cloud computing fundamentals	
---	--

AWARDS/ACHIEVEMENTS

7× Hackathon Competitor: 1st Place Overall — HMI Hackathon 2026, 2nd Place Assurant Challenge — KSU Hackathon for Social Good 2026, 3rd Place Capgemini Net Positive AI — KSU Hackathon for Social Good 2026, 3rd Place Overall — KSU FinTech Hackathon 2025, 3rd Place Healthcare Track — Emory Hacks 2025, Hacklytics 2026 (Georgia Tech), UGAHacks 11 2026
